## **Gas Operated Cement Mixer**

### **General:**

Protecting workers from injuries associated with operation of gas cement mixers.

### **Application:**

Gas operated cement mixers are powered by gasoline.

### **Selection and Use:**

As per job requirement

### **Supervisor Responsibility:**

Supervisors are responsible to facilitate and/or provide proper instruction to their workers on protection requirements.

## **PERSONAL SAFETY**

Always set machine up on level work area.

Stay alert, watch what you are doing and use common sense when operating a mixer. Do not use a mixer while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating mixers may result in serious personal injury.

Dress properly. Do not wear loose clothing, dangling objects, or jewelry. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewelry or long hair can be caught in moving parts. Air vents often cover moving parts and should be avoided.

Use safety apparel and equipment. Use safety goggles or safety glasses with side shields which comply with current national standards, or when needed, a face shield. Use a dust mask in dusty work conditions. This applies to all persons in the work area. Also use non-skid safety shoes, hardhat, gloves, dust collection systems, and hearing protection when appropriate.

Do not overreach. Keep proper footing and balance at all times.

Always use approved container for transportation and refueling.
