Safe Work Procedure for Zoom Boom

General:

Protecting workers from injuries associated with operation of Zoom Boom.

Application:

The Zoom Boom is powered by diesel gasoline.

Supervisor Responsibility:

Supervisors are responsible facilitate and/or provide proper instruction to their workers on protection requirements.

Safety Procedures:

Inspect the machine (hydraulics, tires, oils, and fuels), to ensure that it meets the manufactures specifications.

- Check to see that the motion alarms are working.
- Check the area above, below and around for any obstructions.
- Inspect and test the platform controls, ground controls, and auxiliary power unit.
- Use the ignition switch on the platform to start the engine and allow the machine to warm up.
- Use the platform control lever to drive with the foot switch depressed.
- Check all functions of the controls (boom up, down, etc.)
- Complete your work and retract the boom.
- Turn off the machine and ensure emergency brake is engaged when disembarking machine.
- Never leave the keys with the equipment when it is not in use.
